Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 July 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 10 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
3. Claim 10 is further rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The insertion to page 3, beginning at line 12 constitutes new matter in this application as there was no clear disclosure as filed of a screen that could move either by sliding or pivoting. It appears that the original disclosure was to alternate species of the invention. Rationale for this position is as follows. No detailed description of the interaction of the screen 52 and the frame 50 is set forth as filed except that given in the figures which show the screen clearly located behind the frame 50 at the left side of the frame as well as overlapping the frame at the lower right edge of the screen. Such structure is not able to be pivoted from the position of figure 7 to that of figure 10 as the left edge of the frame intervenes. As a result, the amended specification referenced above constitutes new matter and is required to be deleted from the specification.

Art Unit: 3612

In addition, referring to spring loops 60, page 4, line 1, as pivots is incorrect. In addition, “(not shown)”, page 4, line 1 is incorrect.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In addition to the above rejection, claim 10 is phrased ambiguously in “assume a position at the central zone of the windscreen, or a position that is adjacent the side window”. It is not clear if applicant intends this phrase to indicate the positioning of figure 10 with regard to the side window or whether the position of figure 5 is intended in which case the movement of the conventional visor to the side window position is intended, not the movement of the frame.

Claim 10 is replete with terms lacking clear antecedent such as “the central zone...”, “the side window” and “the windscreen”.

Claim 10 is vague in “conventional visor” as no definition is given for such a term. Applicant should positively recite the characteristics of such a visor.

Claim 10 is incorrect in “behind the base” as the disclosure is clear that the frame is located in front of the base in the inoperative position with apparent tabs gripping behind the base for sliding support.

Claim 10 is apparently incorrect in “either to...” as stated above.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by either Jia or Williams.

The structure is self-explanatory in that each has a base on the visor, a frame movable thereto either adjacent to the side window or the center of the windshield, with a screen located “in the frame” at the end of the frame.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claim 10 is further rejected under 35 U.S.C. 102(e) as being anticipated by Muyo.

Due to the ambiguity of the claims, a further rejection is given as follows:

Muyo has base 20, frame 14, right hand screen 32, with the frame movable to a position below the base via knob 30 and the screen movable toward the windshield center and movable with the visor to a position adjacent the side window.

Response to Arguments

9. Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
